Introduction:

He had moved to Spain when he was 23 years old in order to research on the material for his paintings. Since then, he had been exhibiting his artworks around Europe in the commercial gallery as well as Art Fairs. The colour of his paintings reminds us of energy of bright sun and dark night. The sculpture like quality of paintings, which is made of layers of medium, has the feel of robust nature as if it is dug out of the earth. His carrier in art is over 30 years and continues to create artworks absorbing the beautiful sun light of Spanish sky.
